Subject: FW: Update on Mr. Tom Farmer Issue from Director of Oil & Gas Division of RRC

Andrew- Here's an email I sent Maria back in April after getting a call from the RRC division director I mentioned- Her name is Lori Wrotenbery.

Subject: Update on Mr. Tom Farmer Issue from Director of Oil & Gas Division of RRC

Maria- Ms. Lori Wrotenbery, Director of the Oil & Gas Division of the Texas Railroad Commission, called me this afternoon to give us an update on RRC actions related to the issues raised by Mr. Tom Farmer several weeks ago. She indicated that there wasn't a lot they could do regarding their drilling permits, since they are automated and there are a huge number of them. However, she did say that they recently pulled some back after Mr. Farmer called them, and they added special notations regarding the possibility of wetlands and the possible need for 404 permits. She read the language to me, and it sounded good to me, but it was too much, too fast for me to write down. However, these are not actual permit conditions. She said they are working on a longer-term solution to the problem of identifying RRC permits coming up for this property, due to the USFWS conservation agreement. She also indicated that they did some inspections of some of the drilling sites on Mr. Farmer's property, and did identify some "housekeeping" issues, and they believe they have gotten good compliance on these issues for the time being. If you want to talk to her here's her number: 512-463-6810.
